Authorization for this examiner's amendment was given in a telephone interview with Tom Babbit on November 3, 2005.

Art Unit: 3739

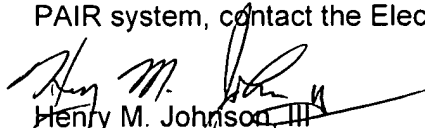

Reasons For Allowance

The prior art of record does not disclose or fairly suggest a rotary cutting instrument with a tube and a shaft with cooperating cutting edges, the shaft having a lumen therein and a handle with a lumen, wherein the lumen in the handle aligns with the lumen of the shaft to allow auxiliary surgical instruments to be inserted. U.S. Patent 4,368,734 to Banko and U.S. Patent 5,810,809 to Rydell both have a shaft lumen in communication with a handle lumen for aspiration or suction, however, the handle lumen is not coaxial with the shaft lumen. While this allows suction or aspiration, it does not allow a physical instrument to be deployed via the handle lumen due to the shaft rotation.
